Ananya Iyer

DATA SCIENCE

Final-year engineering student who builds data products end to end, from SQL pipelines to models that ship. Two internships in fintech analytics and a habit of measuring everything.

EXPERIENCE

Razorpay Data Science Intern · Remote — May 2025 – Aug 2025

Payments fraud analytics

- Built a gradient boosting model that flagged 2,300 risky merchants a month, improving precision by 18% over the rules engine.
- Automated weekly risk reporting in SQL and Python, saving the team 5 hours a week.

Python · SQL · XGBoost · Airflow

Zeta Suite Analytics Intern — Dec 2024 – Feb 2025

- Cleaned and joined 12 million card transactions to find the top reasons for failed payments.
- Presented a Tableau dashboard to the product team; two fixes shipped from it.

SQL · Tableau

PROJECTS

Churn Radar Customer churn early-warning dashboard · personal — 2025

- Predicts which subscribers will cancel in the next 30 days from usage logs, with an AUC of 0.87 on held-out data.

ResumeLens NLP resume screener · hackathon — Mar 2024

- Ranks resumes against a job description with sentence embeddings; won 2nd place among 60 teams.

EDUCATION

RV College of Engineering B.E., Computer Science · Bengaluru — 2022 – 2026

CGPA: 8.9/10

SKILLS

Languages	Python, SQL, R
ML	scikit-learn, XGBoost, PyTorch, NLP
Tools	Airflow, Tableau, Git, Docker
